Master dangerous new powers in a world that is dangerously askew.

In 2017, Oumuamua made headlines as the first interstellar object ever detected passing through our solar system. Everyone remembers that. A web search will tell you all about it.

So why doesn't anyone remember Nibiru? How it curved out of the night, its trajectory changing so rapidly the scientists could barely track it. How the skies blazed when it struck the earth. The seas boiled, and the cities burned.

Except the cities still stand, the sky is unburnt, and only an unlucky few of us have nightmares about Nibiru. Maybe we're losing our minds. Sharing a delusion. And that newfound ability—to turn invisible, to read thoughts, to levitate—is just another shared delusion.

So why are we being hunted down?

- ◆ A gritty and mysterious setting in which characters master emerging superpowers as they face nefarious groups, superpowered opponents, and dark forces somehow connected to memories of a world that met a different future.
- ◆ Loads of adventure content for groups to get playing right away.
- ◆ Dozens of new creatures, cyphers, and artifacts Cypher System gamers will want for any campaign they run!
- ◆ Got customers looking to expand their RPG experiences? The Cypher System is a well-supported line that's easy to learn and play (and sell!).
