

Teratology

It cost many lives—even many souls—to bring you this book.

The famed trailblazer Taramoc Eslin gathered information from throughout the worlds and half-worlds to bring you this: Not just another bestiary, but *the* bestiary. The *Teratology*. The greatest resource on the creatures of the Actuality ever attempted by any vislae.

Find new insights into the realms beneath each sun, along with hundreds of creatures, spirits, and other entities that inhabit those realms, painstakingly (and dangerously) researched and described.

Any vislae venturing from Indigo will find this tome an indispensable resource. Goetics in particular will prize its trove of daringly-acquired insights into summonable beings. And even those who remain within Satyrine will discover many creatures they had not even imagined could be found so close.

- ◆ An Invisible Sun bestiary. This game is unlike any other RPG on the market—and you can bet its creatures are equally unique!
- ◆ Hundreds of bizarre and fascinating creatures. Short-form creatures for encounters; long-form creatures that immerse the GM and form the basis of entire stories.
- ◆ Loads of additional information about the setting of Invisible Sun.
- ◆ Fits in the slipcase that comes with *Book M*—the two titles drive sales of one another.
