Take your campaign into realms unimagined!

The Ninth World is littered with doorways to the other dimensions. What lies beyond? Enter the Grinder of Infinities, explore the Whispering World, take a ride on a Silent Nyek—or enter mysterious Reeval, the source of the notorious Nibovian creatures that have mystified players since the *Numenera* corebook was first published. And even if your campaign never leaves the Ninth World, encounter creatures, NPCs, cyphers and more marooned in our universe from somewhere . . . outside.

Into the Outside continues the exploration of the Numenera universe begun in the hit title *Into the Night*. You'll find it loaded with the weird and fascinating science-fantasy sensibilities that set Numenera apart from any other roleplaying game!

- ◆ The first new Numenera tabletop title following the launch of the Torment: Tides of Numenera PC/console game.
- ◆ Do you have Cypher Play: Numenera organized play in your store? Your players are going to want this title!
- ◆ Loads of new creatures, cyphers, and artifacts for any Numenera campaign.
- ◆ Plenty of detailed encounters and adventure seeds to keep your Numenera fans playing—and fans who play are fans who keep coming back to your store for more Numenera!
