Cypher Deck, XP Deck, and Creature Deck

Created as game aids to easily randomize and track transient items, **The Strange** Cypher Deck, XP Deck, and Creature Deck are among the best-selling PDF products for the line. Now they're available through retail, in a single well-priced, easy-to-shelf package!

The three decks come in a sturdy rigid box, sized to sit neatly alongside **The Strange** books on your RPG shelves. The internal tray holds the three existing decks, with room to store future expansions.

The **Cypher Deck** allows GMs and players to randomly generate single-use cyphers on the fly. Each of the 100 power cards offers multiple power options, while 20 form cards describe the item's appearance in each of six possible recursion laws.

The **XP Deck** provides a set of tangible tokens to represent experience points—a sort of game currency that often changes hands between players.

The **Creature Deck** contains 100 commonly encountered creatures. Draw a card to quickly build an encounter: One side has basic stats (with a reference to the book for full stats and info), and the reverse has an image to share with the players.

- Three big, non-randomized decks totaling 250 cards make it easy to skip the big tables and simply draw a card.
- The great price makes this an easy upsell!
- The box is perfectly sized and designed to shelve easily alongside other RPG products, just like Numenera's Cypher Chest product.

Game Line: The Strange
MSRP: \$29.99
Stock Code: MCG070

ISBN: 978-1-939979-36-0
Specs: Rigid box, 8.5" x 11", full color, 250 cards
