TAKE YOUR CYPHER SYSTEM CAMPAIGN TO MYSTERIOUS NEW PLANES!

A cursed moon hurtles through the multiverse, crashing from one plane to the next, never at rest, forever fleeing a catastrophe that predates existence itself. Behold the Planebreaker!

The Planebreaker visits all planes, all demiworlds, and all dimensions. Some are known to sages and planar travelers. But in a multiverse stretching across epochs, the number of previously uncatalogued planes is vast. The Planebreaker races through all of them, in time, and the Path that trails behind it creates a route that links them all.

Path of the Planebreaker introduces this enigmatic interplanar object and dozens of exotic new planes to explore.

- ◆ The Cypher System version of the hit 5E title!
- ◆ Details dozens of planes in a GM-friendly ready-to-use format, along with the very cool Planebreaker itself, with its mythic city of Timeborne.
- ◆ For the GM: new creatures, artifacts, and adventures.
- ◆ For the players: new playable species, foci, abilities, and cyphers.
- ◆ Chock full of MCG creativity and top-notch production values, from the incredible minds of legendary D&D designers Monte Cook, Bruce Cordell, and Sean Reynolds. You know it's going to be awe-inspiring!
