## An astonishing amount of magic in a compact box

Magic is the very heart of Invisible Sun, and there is *so much magic* in this game! And it's all on cards—not just spells, but also ephemera, objects of power, incantations, and more. These cards don't duplicate text from the books—they're not just a game accessory, but are critical to how the game is played.

Even with 1000 magic cards in **Invisible Sun: Indigo**, it can very handy to have a second set. This box includes all the magic cards from in Invisible Sun: Indigo—spell cards, ephemera, objects of power, even Vance spell cards and Weaver aggregates. They're all stored in a sturdy and beautiful deck box that leaves room to add your cards from supplements such as The Wellspring.

- ◆ Literally six pounds (almost three kg) of cards, every one of them unique. This is a magic system with heft!
- ◆ With multiple systems for how magic is used, and amazingly imaginative effects, magic in Invisible Sun is lyrical, sophisticated, and always a bit surprising—like the game itself!
- ◆ This is a duplicate of the full set found in the **Invisible Sun: Indigo** core game, perfect for gamers who want a second set.
- ◆ Invisible Sun is elegant, sophisticated, and beautiful—the physical product and the gameplay too. There's no other RPG like it!
